

**Company:** Runatek

**Position:** Software Engineering Intern

**Reports To:**

The Software Engineering Intern will report to the Head of Software and CTO.

**Job Overview:**

This unpaid internship provides an experiential learning opportunity for students pursuing degrees in STEM to become familiar with arduino-based software, feedback control systems, encryption, and medical electronics. Interns will also gain a foundation in medical technology and the development and approval process. Opportunities will be made available for Interns to learn to work with the hardware engineering, and the business side of the company to offer a full experience working with a startup company in the medical device industry. The responsibilities of this position may be performed 90-100% remote. Interns may choose to work in person in the Dallas office to make it easier for certain projects.

**Responsibilities and Duties:**

Designing circuits and electronic assemblies.

Coding in arduino, python, or other programming languages.

Working with the product design team to develop feedback control software.

**Basic Qualifications:**

Must be pursuing a degree in computer science, information technology, or engineering.

Familiarity with computer languages such as python, C++, or arduino.

English proficiency.

Runatek is an Equal Opportunity Employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, veteran's status, or, any other protected characteristic.
